#### **DETAILED ACTION**

#### Specification

The disclosure is objected to because of the following informalities: The specification appears to missing the required section entitled <u>Brief Description of the Several Views of the Drawing(s)</u>: See MPEP § 608.01(f). A reference to and brief description of the drawing(s) as set forth in 37 CFR 1.74. Appropriate correction is required.

#### Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-4 are rejected under 35 U.S.C. 101 because they are- drawn to non-statutory matter. The claimed recitation of a process, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example Ex parte Dunki, 153 USPQ 678 (Bd.App. 1967) and Clinical Products, Ltd. v. Brenner, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/694,921 Page 3

Art Unit: 1621

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1-4 are drawn to the use of a compound of formula (I) in the induction of RANTES, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced. Claims 1-4 are therefore rendered indefinite.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 5 and 6 are rejected under 35 U.S.C. 102(B) as being anticipated by Suzuki et al, The Induction Of β-chemokines By Glycyrrhizin (GR), An Active Component Of Licorice Roots, in Cultures of Peripheral Blood Mononuclear Cells, Journal Of Allergy And Clinical Immunology, Vol. 105, No. 1, Part 2, January 2000, page S113). Suzuki discloses (Paragraph 339, column 2, lines 25-26) that treatment with pharmaceutical compositions of Glycyrrhizin (GR), a compound of formula (I), causes both CD4<sup>+</sup> and CD8<sup>+</sup> T cells to produce RANTES. Suzuki further discloses

Application/Control Number: 10/694,921

Art Unit: 1621

(Paragraph 339, column 2, lines 27-32) (Paragraph 339, column 2, lines 25-26) the treatment of HIV infection with GR. Suzuki therefore anticipates claims 5 and 6.

Page 4

5. Claims 5 and 6 are rejected under 35 U.S.C. 102(B) as being anticipated by Utsunomiya et al (Clinical and Experimental Immunology, Effects of Glycyrrhizin, an Active Component of Licorice Roots, on Candida Albicans Infection in Thermally Injured Mice, Oxford, GB, Vol. 116, No. 2, May 1999, Pages 291-298) as illuminated by Suzuki et al, The Induction Of β-chemokines By Glycyrrhizin (GR), An Active Component Of Licorice Roots, in Cultures of Peripheral Blood Mononuclear Cells, Journal Of Allergy And Clinical Immunology, Vol. 105, No. 1, Part 2, January 2000, page S113 ). Utsunomiya discloses (Page 296, column 2, 2<sup>nd</sup> full paragraph) the protective effect of treatment of immunocompromised (burned) mice with pharmaceutical compositions containing glycyrrhizin (GR), a compound of formula (I), against infection by *C. albicans*. The Examiner notes that this treatment inherently induces the production of RANTES as illuminated (Paragraph 339, column 2, lines 25-26) by Suzuki.

### Claim Objections

- Claims 5 and 6 are objected to as depending upon non-statutory claims 1-4.
   Applicant should amend claims 5 and 6 to include the required limitations of the non-statutory claims. Appropriate correction is required.
- 7. Claim 6 is objected to because of the following informalities: Claim 6 recites the phrase "comprising: containing" in line 1. Appropriate correction is required.

Application/Control Number: 10/694,921

Art Unit: 1621

273-8300.

Conclusion

Page 5

8. Claims 1-6 are pending Claims 1-6 are rejected. Claims 5 and 6 are objected to.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul A. Zucker whose telephone number is 571-272-

0650. The examiner can normally be reached on Monday-Friday 5:30-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann R. Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
